

ICT enabled tools for effective teaching-learning process

Education across the global landscape is currently undergoing profound shifts, embracing novel paradigms in teaching and learning practices, all within the encompassing sphere of ICT-driven learning environments. While traditional education relied on rote learning, rules, and procedures, the contemporary educational ethos emphasizes project-based learning, problem-solving, creative inquiry, design thinking, discovery, invention, diversity, and introspective learning. Notably, this transition signifies a pivotal move from an instructor-centric approach to an empowering learner-centered paradigm.

Within our institution, educators harness the power of ICT tools to elevate teaching and learning experiences, employing Learning Management Systems (LMS) and digital learning resources.

Empowering Learning through LMS and Digital Resources:

Our faculty members embrace cutting-edge pedagogies infused with ICT methodologies, enriching classroom interactions.

The integration of multimedia tools such as LCD projectors, Digital Boards, and internet-enabled devices has become a standard practice in our classrooms.

Audio-visual aids, sourced from the National Programme on Technology Enhanced Learning, offers an extensive array of resources, encompassing books, journals, and competitive magazines.

Departments regularly host seminars, workshops, and guest lecturers to ensure both faculty and students remain attuned to the latest advancements in core subjects.

Equipped with state-of-the-art multimedia facilities and ICT tools, our seminar hall hosts engaging invited talks and webinars, enriching the educational experience.
