### General Instructions

1. Passbook is a record of transactions for the information of the depositor and balance shown in it cannot be claimed legally.
2. It is the duty of the depositor to confirm balance shown in the passbook from the concerned post office and post office is legally liable to pay the amount actually available in its record.
3. Always take a printed receipt from the post office when you hand over the passbook to the post office for any purpose.
4. Always keep the passbook in your personal custody and post office will not be responsible for any loss of money in case passbook is handed over to any other person.
5. Do not keep specimen signatures in the passbook.
6. Check balance after transaction written in the passbook and contact postmaster immediately in case of any discrepancy.
7. In case of loss of passbook, report the matter in writing to the postmaster immediately.
8. Intimate change of address if any to the postmaster.
9. Don't hand over blank signed withdrawal forms to any person including authorized agents.
10. Do not appoint postmasters or authorized agents as messengers for withdrawal of money from your account.

--------------	--------	--------------

Premium Paid under this policy is eligible for tax benefit under section 80C of the Income Tax Act, 1961 as applicable.

Goods & Service Tax (GST)/ Cess and/or any other statutory levy/ duty/ surcharge, at the rate notified by the Central Government/ State Government/ Union Territories of India from time to time, shall be levied on premium / charges (as applicable) as per the provisions of the prevalent tax laws.

For single premium annuity policy, the taxable value is 10% of the premium/ charges @ 18% on premium or charges. (or as applicable) w.e.f 01.07.2017. In the case of endowment policy, the taxable value is 10% of the premium/ charges @ 18% on premium or charges. (or as applicable) w.e.f 01.07.2017.

Goods & Service Tax (GST)/ Cess and/or any other statutory levy/ duty/ surcharge, at the rate notified by India from time to time, shall be levied on premium / charges (as applicable) as per the provisions of the prevalent tax laws. As per GOI notification, GST has been levied on your insurance policy @ 18% on premium or charges. (or as applicable) w.e.f 01.07.2017. In the case of endowment policy, the taxable value is 25% of the premium for first year and 12.5% for second & subsequent year. For single premium annuity policy, the taxable value is 10% of the premium. Please refer SBI Life website for details.

policy, the taxable value is the sum of the premium. Please refer SBI Life website for details.

TDS shall be deducted from the benefit proceeds (i.e. maturity, surrender etc) , as applicable, which are considered as taxable under the Income Tax Laws. Tax laws are subject to change from time to time. Please consult your tax advisor for further details.

## General Instructions

1. Passbook is a record of transactions for the information of the depositor and balance shown in it cannot be claimed legally.
2. It is the duty of the depositor to confirm balance shown in the passbook from the concerned post office and post office is legally liable to pay the amount actually available in its record.
3. Always take a printed receipt from the post office when you hand over the passbook to the post office for any purpose.
4. Always keep the passbook in your personal custody and post office will not be responsible for any loss of money in case passbook is handed over to any other person.
5. Do not keep specimen signatures in the passbook.
6. Check balance after transaction written in the passbook and contact postmaster immediately in case of any discrepancy.
7. In case of loss of passbook, report the matter in writing to the postmaster immediately.
8. Intimate change of address if any to the postmaster.
9. Don't hand over blank signed withdrawal forms to any person including authorized agents.
10. Do not appoint postmasters or authorized agents as messengers for withdrawal of money from your account.

## Best Practice

**1. Title:** Blood grouping

**2. Objective :**

The objective of blood grouping as a best practice is to determine a person's blood type accurately. This information is crucial for various medical procedures, including transfusions, organ transplants, and pregnancy-related care. It helps ensure compatibility between donors and recipients, minimizing the risk of adverse reactions and improving patient safety during medical interventions involving blood. Additionally, blood grouping aids in forensic investigations and can be vital in emergencies when immediate blood transfusion is required. Overall, accurate blood typing is fundamental for providing effective and safe healthcare.

**3. Challenges :**

**Accuracy and Reliability:** Ensuring that blood typing tests are accurate and reliable is paramount. False results can lead to severe medical complications, so quality control and validation of testing methods are crucial.

**Availability of Reagents and Supplies:** Ensuring a steady supply of reagents and testing supplies, especially in remote or resource-limited areas, can be challenging and requires logistical planning.

**Blood Type Discrepancies:** Occasionally, individuals may have rare or complex blood types that can be challenging to identify. Laboratories must be prepared to handle these situations and consult experts if needed.

**4. The Practice**

Blood grouping is a fundamental aspect of personal health management and emergency preparedness. By implementing these best practices in degree colleges, students can be educated about the importance of knowing their blood types, which contributes to a safer and more resilient campus community. These practices also foster a culture of voluntary blood donation and responsible healthcare, ultimately benefiting both individual well-being and the greater society.

## 5. Evidence of Success

Blood grouping's success is evident in its ability to save lives through safe transfusions, meeting benchmarks for reduced transfusion-related complications. Reviews indicate improved patient outcomes, reduced transfusion reactions, and enhanced compatibility. These results underscore the effectiveness of blood grouping as a best practice in healthcare.

## 6. Problems Encountered and Resources Required

Implementing blood grouping as a practice would require trained personnel, blood typing reagents, testing equipment, and a safe environment. Problems may include inadequate funding, a shortage of skilled technicians, and ensuring the safety and integrity of blood samples.

## 7. Notes:

For successful adoption, institutions should invest in quality training, modern testing equipment, and rigorous quality control measures. Collaboration with blood banks and ongoing education is vital to ensure safe and effective implementation of blood grouping as a best practice.

## Blood grouping

22-08-22

As a part of Best Practice, the department of Zoology gave training and encouraged the II BZC students to do blood grouping to B.Sc. students of CSTS Govt. Kalasala, Jangareddigudem. The students done blood grouping to nearly 30 students. This programme is conducted under supervision of Smt.R. Vijayadeepika, Lec.in Zoology& CH. Venkata Lakshmi, Lecturer in Zoology, with the permission of Principal Dr.N. Prasad Babu, CSTS Government kalasala, jangareddigudem.

### Letter of Appreciation

Ref. No. STIITB/2023/1200

17th April 2023

To,  
**Dr. K. Uttamsagar**  
Lecturer,  
Department of Commerce,  
CSTS Government Kalasala, Jangareddigudem,  
Andhra Pradesh, India.

This is to express thanks and appreciation to **Dr. K. Uttamsagar**, for spreading awareness and holding the “**Introduction to Computers**” Student Development Program (6<sup>th</sup> April 2023 to 13<sup>th</sup> April 2023) attended by 33 students, organized by **CSTS Government Kalasala, Jangareddigudem** in collaboration with **Spoken Tutorial, IIT BOMBAY**.

You are making an outstanding contribution to using ICT-based teaching and learning methodology for your faculty members and students. Your contributions to the implementation of the Spoken Tutorial Project are significant and have played a part in it becoming the fastest-growing NMEICT Project. Your excellent skills and courteous personality have helped tremendously in spreading awareness of Spoken Tutorial IIT Bombay.

I would like to personally thank you for contributing to the software training and awareness events in your Institute. I am sure that we will continue to get your continued support for making India IT literate and spreading project existence in the state of Andhra Pradesh.

For and On behalf of  
**Spoken Tutorials,**  
**Indian Institute of Technology, Bombay**

IIT Bombay

## Certificate for Completion of Training

This is to certify that **DHIRAJ KUMAR VEMURI** successfully passed a **Introduction to Computers** test, remotely conducted by the Spoken Tutorial project, IIT Bombay, under an honour invigilation system.

Self learning through Spoken Tutorials and passing an online test completes the training programme.

**Credits: 1    Score: 85.00%**

A handwritten signature in black ink, appearing to read 'Kannan Moudgalya'.

**Prof. Kannan M Moudgalya**  
IIT Bombay

Credits for the Spoken Tutorial courses are based on our estimates of the work required to complete them. Recipient institutions are required to apply due diligence and get them ratified/modified by their own duly formed academic/assessment body. Spoken Tutorial is a project at IIT Bombay, started with funding from the National Mission on Education through ICT, Ministry of Education (previously MHRD), Govt. of India.

**CSTS GOVERNMENT KALASALA  
JANGAREDDIGUEDEM**

**DEPARTMENT OF ZOOLOGY**

**BEST PRACTICE**

**On**

**BLOOD GROUPING**

**2022-23**

## Best Practice

### 1. Title: Blood grouping

### 2. Objective :

The objective of blood grouping as a best practice is to determine a person's blood type accurately. This information is crucial for various medical procedures, including transfusions, organ transplants, and pregnancy-related care. It helps ensure compatibility between donors and recipients, minimizing the risk of adverse reactions and improving patient safety during medical interventions involving blood. Additionally, blood grouping aids in forensic investigations and can be vital in emergencies when immediate blood transfusion is required. Overall, accurate blood typing is fundamental for providing effective and safe healthcare.

### 3. Challenges :

**Accuracy and Reliability:** Ensuring that blood typing tests are accurate and reliable is paramount. False results can lead to severe medical complications, so quality control and validation of testing methods are crucial.

**Availability of Reagents and Supplies:** Ensuring a steady supply of reagents and testing supplies, especially in remote or resource-limited areas, can be challenging and requires logistical planning.

**Blood Type Discrepancies:** Occasionally, individuals may have rare or complex blood types that can be challenging to identify. Laboratories must be prepared to handle these situations and consult experts if needed.

### 4. The Practice

Blood grouping is a fundamental aspect of personal health management and emergency preparedness. By implementing these best practices in degree colleges, students can be educated about the importance of knowing their blood types, which contributes to a safer and more resilient campus community. These practices also foster a culture of voluntary blood donation and responsible healthcare, ultimately benefiting both individual well-being and the greater society.

### 5. Evidence of Success

Blood grouping's success is evident in its ability to save lives through safe transfusions, meeting benchmarks for reduced transfusion-related complications. Reviews indicate improved patient outcomes, reduced transfusion reactions, and enhanced compatibility. These results underscore the effectiveness of blood grouping as a best practice in healthcare.

## 6. Problems Encountered and Resources Required

Implementing blood grouping as a practice would require trained personnel, blood typing reagents, testing equipment, and a safe environment. Problems may include inadequate funding, a shortage of skilled technicians, and ensuring the safety and integrity of blood samples.

## 7. Notes :

For successful adoption, institutions should invest in quality training, modern testing equipment, and rigorous quality control measures. Collaboration with blood banks and ongoing education is vital to ensure safe and effective implementation of blood grouping as a best practice.

## MINUTES MEETING

13.07.23

Smt. R. Vijaya Deepika, Lec. in Zoology met Principal Dr. N. Prasad Babu at his chamber along with JAC Co-ordinator, Dept. of Botany and Dept. of Horticulture on 13.07.23 at 3PM. The following issues were discussed and resolved.

- 1) Online Admission
- 2) AKNV Practical & Theory Examinations
- 3) 6 months Internship - viva voce
- 4) To conduct Blood grouping for the first year students.

### Blood Grouping as Best practices

Blood grouping is practiced as one of the best practices in the Department of Zoology in CSTS Government Degree College, Jangareddigudem. Dr. N. Prasad Babu, Principal known for his unwavering support for community service initiatives, graced the occasion as the esteemed chief guest. His presence added an air of importance and encouragement to the event, inspiring the students to give their best. He emphasized the significance of blood donation and how every contribution could potentially save lives in times of dire need. R. Vijaya Deepika, Lecturer in Zoology and CH. Venkata Lakshmi, Lecturer in Zoology assisted in the blood grouping process, ensuring accuracy and safety. II BZC students of CSTS Government Kalasala, Jangareddigudem have done blood grouping to students of CSTS Government Kalasala, Jangareddigudem. As blood groups were determined and recorded, a sense of satisfaction pervaded the atmosphere, knowing that this information would be invaluable in times of emergencies. U. Venkatacharyulu, Lecturer in Chemistry, T. Jhansi Rani, Lecturer in Botany and students participated in the event

## Best Practice

**1. Title:** Blood grouping

### 2. Objective :

The objective of blood grouping as a best practice is to determine a person's blood type accurately. This information is crucial for various medical procedures, including transfusions, organ transplants, and pregnancy-related care. It helps ensure compatibility between donors and recipients, minimizing the risk of adverse reactions and improving patient safety during medical interventions involving blood. Additionally, blood grouping aids in forensic investigations and can be vital in emergencies when immediate blood transfusion is required. Overall, accurate blood typing is fundamental for providing effective and safe healthcare.

### 3. Challenges :

**Accuracy and Reliability:** Ensuring that blood typing tests are accurate and reliable is paramount. False results can lead to severe medical complications, so quality control and validation of testing methods are crucial.

**Availability of Reagents and Supplies:** Ensuring a steady supply of reagents and testing supplies, especially in remote or resource-limited areas, can be challenging and requires logistical planning.

**Blood Type Discrepancies:** Occasionally, individuals may have rare or complex blood types that can be challenging to identify. Laboratories must be prepared to handle these situations and consult experts if needed.

#### 4. The Practice

Blood grouping is a fundamental aspect of personal health management and emergency preparedness. By implementing these best practices in degree colleges, students can be educated about the importance of knowing their blood types, which contributes to a safer and more resilient campus community. These practices also foster a culture of voluntary blood donation and responsible healthcare, ultimately benefiting both individual well-being and the greater society.

#### 5. Evidence of Success

Blood grouping's success is evident in its ability to save lives through safe transfusions, meeting benchmarks for reduced transfusion-related complications. Reviews indicate improved patient outcomes, reduced transfusion reactions, and enhanced compatibility. These results underscore the effectiveness of blood grouping as a best practice in healthcare.

#### 6. Problems Encountered and Resources Required

Implementing blood grouping as a practice would require trained personnel, blood typing reagents, testing equipment, and a safe environment. Problems may include inadequate funding, a shortage of skilled technicians, and ensuring the safety and integrity of blood samples.

#### 7. Notes:

For successful adoption, institutions should invest in quality training, modern testing equipment, and rigorous quality control measures. Collaboration with blood banks and ongoing education is vital to ensure safe and effective implementation of blood grouping as a best practice.

06-02-2024

Smt. R. Vijaya Deepika, Loc. in Zoology met Principal Mr. N. Basad Babu along with JQAC co-ordinators, Dept. of Botany & Dept. of Horticulture at his chamber on 06-02-2024 at 5 PM. The following issues were discussed and resolved -

- 1.) 5 day non-residential TOT at NRC, Tanuku
- 2.) Status of NAAC files
- 3.) Admission campaign
- 4.) World Sparrow day on 20-03-24
- 5.) To conduct Blood grouping as Best Practice on 26-03-24

## BLOOD GROUPING

26.04.24

The Department of Zoology is going to conduct "Blood Grouping" as a best practice today i.e. 26.04.24 at 3-5 PM at Zoology Lab for all students of CSTS Government Kalasala, Tanjoreddigudem. All the staff and students are request to attend the programme without fail.

note :- All the first year students utilize this opportunity

# Best Practice-Blood Grouping

27.03.2024

The Department of Zoology at CSTS Government kalasala, Jangareddigudem organized a blood grouping program for students as part of its Best Practices initiative on 26.03.2024 & 27.03.2024 at Zoology Lab. The program aimed to:

## Identify Blood Groups:

- Students were tested to determine their ABO blood group (A, B, AB, or O) and Rh factor (positive or negative).
- Raise Awareness: The program provided students with knowledge about blood groups, their significance in blood transfusions, and the concept of universal donors and recipients.
- Potential Benefits: Knowing their blood group empowers students to be prepared for medical emergencies and consider future blood donation opportunities.

## Program Highlights:

The program was presided over by the college principal, Dr. N. Prasad Babu.

- Dr. Prasad Babu emphasized the importance of students knowing their blood group for emergency situations and blood donation.
- Vice Principal B. Srinivasa Rao spoke about the Best Practices initiative and encouraged students to participate actively in such programs.
- Under the guidance of Zoology department head Smt. R. Vijaya Deepika, blood grouping tests were conducted for 100 students.
- The program was also attended by the college's IQAC coordinator M. Madhu, The college IQAC coordinator M. Madhu, the head of the Mathematics Department CH. Badri Narayan, the head of the Chemistry Department CH. Venkatacharyulu, the head of the Botany Department T. Jhansi Rani, and the head of the Horticulture Department CH. Venkatalakshmi.

## Conclusion:

The blood grouping program was a successful initiative by the Department of Zoology. It aligned with the college's Best Practices commitment and provided students with a valuable learning experience.

## **Feedback-Blood Grouping**

1. How would you rate your overall satisfaction with the blood grouping activity?

- |                   |                 |
|-------------------|-----------------|
| a) Very satisfied | b) Satisfied    |
| c) Neutral        | d) Dissatisfied |

2. Did you find the instructions provided during the blood grouping experiment:

- |                   |            |
|-------------------|------------|
| a) Very clear     | b) Clear   |
| c) Somewhat clear | d) Unclear |

3. How helpful was the hands-on experience of blood typing in understanding blood groups?

- |                       |            |
|-----------------------|------------|
| a) Helpful            | b) Neutral |
| c) Not helpful at all |            |

4. What challenges did you encounter during the blood grouping experiment? (Select all that apply)

- |   |                                       |
|---|---------------------------------------|
| a) Difficulty understanding the procedure | b) Issues with equipment or materials |
| c) Confusion about interpreting results   | d) None                               |

5. How would you rate the safety measures implemented during the blood typing activity?

- |              |              |
|--------------|--------------|
| a) Excellent | b) Good      |
| c) Poor      | d) Very poor |

6. How effective were the materials and equipment provided for the blood grouping experiment?

- |                   |                     |
|-------------------|---------------------|
| a) Very effective | b) Effective        |
| c) Ineffective    | d) Very ineffective |

# **Aim of Postal Savings:**

## **Financial Literacy:**

To educate students about the importance of saving, investing, and managing finances effectively.

## **Financial Independence:**

To empower degree students to become financially independent by cultivating responsible saving habits.

## **Long-Term Planning:**

To encourage degree students to plan for their future financial goals, such as further education or starting a business.

## **Economic Stability:**

To contribute to the economic stability of students by providing them with a platform to build their savings and assets.

# **Objectives:**

## **Education:**

Provide educational resources, workshops, and seminars on financial literacy topics such as budgeting, saving strategies, investment options, and debt management.

## **Access:**

Facilitate easy access to savings accounts or investment opportunities tailored to the needs and preferences of degree students, possibly through partnerships with financial institutions or special student accounts.

## **Engagement:**

Foster a sense of engagement and participation among degree students through interactive activities, challenges, and incentives aimed at encouraging regular saving habits.

## **Support:**

Offer personalized guidance and support services to assist the students in setting financial goals, creating savings plans, and overcoming any barriers to saving.

# Outcomes:

## **Increased Savings:**

Degree students demonstrate an increase in their savings balances over time, indicating improved saving habits and financial discipline.

## **Financial Confidence:**

Students feel more confident and empowered in their ability to manage their finances effectively and make informed financial decisions.

## **Goal Achievement:**

Make progress towards achieving their financial goals, whether short-term (e.g., building an emergency fund) or long-term (e.g., saving for graduate school or a down payment on a house).

## **Long-Term Impact:**

Develop lifelong habits of saving and financial responsibility that contribute to their overall financial well-being and economic stability beyond their academic years.

## Aim of Vermicomposting as a Best Practice

**1. Organic Waste Management:** Vermicomposting provides a sustainable solution for managing organic waste, including kitchen scraps, yard trimmings, and other biodegradable materials. Instead of sending these materials to landfills where they contribute to methane emissions, vermicomposting converts them into nutrient-rich compost.

**2. Production of High-Quality Compost:** Vermicomposting produces compost that is rich in essential nutrients, microorganisms, and beneficial enzymes. This compost enhances soil fertility, structure, and moisture retention, promoting healthy plant growth and reducing the need for chemical fertilizers.

**3. Reduced Environmental Impact:** By diverting organic waste from landfills, vermicomposting helps reduce greenhouse gas emissions and alleviates the burden on landfill capacities. It also minimizes the need for synthetic fertilizers and pesticides, which can have harmful effects on soil, water, and ecosystems.

## Objectives:

**1. Resource Conservation:** Vermicomposting conserves valuable resources by recycling organic materials back into the soil, closing the nutrient cycle. It reduces the reliance on finite resources such as synthetic fertilizers derived from fossil fuels and mined minerals.

**2. Community Engagement and Education:** Vermicomposting initiatives promote community engagement and education about sustainable waste management practices. They encourage individuals, households, schools, businesses, and communities to participate actively in reducing waste and promoting environmental stewardship.

**3. Scalability and Accessibility:** Vermicomposting systems can be implemented at various scales, from small-scale bins in homes and schools to larger systems in community gardens or commercial operations. Its scalability makes it accessible to a wide range of individuals and organizations seeking sustainable waste management solutions.

**4. Soil Health and Biodiversity:** Vermicompost improves soil health by increasing organic matter content, enhancing soil structure, and supporting microbial activity. Healthy soils contribute to increased plant productivity, biodiversity, and resilience to environmental stresses such as drought and disease.

## Procedure:

The procedure for preparing vermicompost involves several steps:

### Materials Needed:

- Organic waste (such as kitchen scraps, yard waste, shredded paper)
- Red worms (*Eisenia fetida* or red wigglers)
- A composting bin or container
- Moisture-retaining bedding material (shredded newspaper, cardboard, coconut coir)
- Water spray bottle

### Steps:

1. Choose a Bin: Select a suitable container or bin for vermicomposting. It should be well-ventilated with drainage holes and opaque or dark-colored to keep light out, as worms prefer darkness.
2. Prepare Bedding: Create a bedding layer using moistened shredded paper, cardboard, or coconut coir. This bedding provides a habitat for worms and helps retain moisture.
3. Add Worms: Introduce red worms to the bedding. Start with a sufficient amount based on the volume of waste you'll be composting. Ensure the worms are evenly distributed throughout the bedding.
4. Add Organic Waste: Begin adding organic kitchen scraps (fruit and vegetable peels, coffee grounds, eggshells) and other biodegradable materials. Avoid meat, dairy, oily foods, and pet waste.
5. Maintain Moisture: Keep the bedding moist but not soggy. Use a water spray bottle to lightly moisten the bedding as needed. Ensure proper aeration by turning the compost occasionally.
6. Cover and Maintain Conditions: Cover the container with a lid or a damp burlap sack to maintain darkness and moisture levels. Maintain an optimal temperature range of 55-77°F (13-25°C) for the worms.

7. Wait and Monitor: Allow the worms to process the organic waste. They will consume and break down the materials, turning them into nutrient-rich vermicompost. Monitor the moisture level and add water if it becomes too dry.

8. Harvest the Vermicompost: Once the compost is dark and rich, separate the worms from the compost. Move the contents to one side of the bin and add fresh bedding and food to the empty side. The worms will migrate to the new food source, allowing you to harvest the vermicompost from the other side.

9. Use the Vermicompost: The harvested vermicompost is now ready for use! It can be added to garden soil, used as a potting mix component, or applied as a natural fertilizer to plants.

Regular maintenance, proper feeding, and monitoring of moisture levels are crucial for successful vermicomposting. Adjustments may be necessary based on environmental conditions and the quantity of waste being processed.

## **Conclusion :**

**Vermicomposting is not just about managing waste; it's about nurturing a healthier planet, educating future generations, and inspiring action. This eco-friendly champion, starting with a tiny worm and a pile of "waste," holds the potential to create a more sustainable future for all.**
