

CSTS GOVERNMENT KALASALA

BEST PRACTICE

Title of the practice:

Empowering the Marginalized: A Community Outreach Initiative

Objectives of the practice:

- To provide essential provisions to the Sita Mahalakshmi Voluntary Organization for physically handicapped orphans and elderly individuals.
- To engage in meaningful interaction and companionship with the residents of the organization.
- To raise awareness about the needs and challenges faced by the marginalized community members.
- To foster a sense of empathy and social responsibility among faculty, staff, and students.

Context:

The initiative was organized by the Department of Chemistry in collaboration with all teaching and non-teaching members of the institution. It aimed to address the needs of a vulnerable segment of society while also fostering a spirit of empathy and community engagement among participants.

Practice:

The event involved the collection and donation of essential items such as rice and fruits to the Sita Mahalakshmi Voluntary Organization. Additionally, participants spent quality time with the residents, engaging in conversations and offering companionship and support.

Evidence of Success:

Success was measured by the impact of the donations on the organization and its residents, as well as the quality of interaction between participants and beneficiaries. Positive feedback from the organization, improved morale among residents, and increased awareness among participants were indicators of success.

Problems Encountered:

Challenges such as logistical issues in coordinating donations, limited resources, and time constraints may have been encountered during the execution of the initiative. Additionally, communication barriers or cultural differences could have posed challenges in engaging with the residents effectively.

Resources Required:

Essential provisions such as rice, fruits, and other non-perishable items.

Transportation for delivering donations to the organization.

Volunteer time from faculty, staff, and students.

Communication materials to raise awareness about the initiative.

Potential financial resources for purchasing additional supplies or addressing unforeseen needs.

Notes:

Collaboration and coordination among all stakeholders are essential for the success of such initiatives.

Regular communication and feedback mechanisms can help address challenges and improve future efforts.

Sustainability should be considered, with efforts made to establish ongoing support and engagement with the organization and its beneficiaries.

Any other information

On the 15th of December 2023, the Department of Chemistry, in conjunction with all faculty and staff members, both teaching and non-teaching, embarked on a charitable endeavor.

Together, they generously donated essential provisions such as rice and fruits to the Sita Mahalakshmi Voluntary Organization, which caters to the welfare of physically handicapped orphans and elderly individuals in Jangareddygudem.

This act of benevolence was not merely about material contributions; it was accompanied by heartfelt interaction as well. Members of the department spent quality time with the residents

of the organization, extending companionship and support beyond the realms of mere donations.

The initiative was graced by the presence of esteemed individuals from our college administration. Dr. N. Prasad Babu, the principal, along with Sri B. Srinivasarao, the vice-principal, and Sri U. Venkatacharyulu, the Chemistry Incharge, demonstrated exemplary leadership by actively participating in the event. They were joined by a dedicated team of faculty members including Dr. M. Madhu, Dr. Ch. Badarinarayana, Dr. UttamSagar, T. Jhansi Rani, Ch. Ramadevi, Dr. G. V. Lal, and numerous other teaching and non-teaching staff, alongside compassionate students.

During the gathering, Sri JayavarapuShekhar, the organizer, eloquently elucidated the ongoing activities and pressing needs of the organization. His insightful presentation shed light on the challenges faced by the physically handicapped, orphaned, and elderly residents, emphasizing the importance of community support and involvement.

Through this collaborative effort, the Department of Chemistry and its allies exemplified the essence of compassion and solidarity, extending a helping hand to the marginalized members of society. Such acts of kindness not only alleviate immediate needs but also foster a sense of belonging and dignity among those in need, reaffirming the noble values upheld by our academic institution.
